FLEXIBLE FIBERGLASS RIBS

BUILT FOR COMFORT. BUILT TO LAST.

FiberBuilt Umbrellas & Cushions is dedicated to manufacturing state-of-the-art shade products for hotel, restaurant, country club, and many other hospitality and commercial uses as well as apartment and residential applications desiring contract quality umbrellas.

- Our innovative fiberglass rib construction ensures strength, resilience and durability. They absorb wind gusts, have been tested to over 50 MPH and last significantly longer than steel or wood ribbed umbrellas.
- Select models have tested at over 75 MPH. These models incorporate heavy duty poles and specialized venting, such as Aruba and double vents.
- We have developed a full line of contract quality umbrellas that hold up to the harshest weather conditions - intense sunlight, high winds, salt air and driving rain - and will not decay or lose their shape.
- For its inherent strength and longevity, the standard canopies of most of our umbrellas and cabanas are made of marine grade fabric.
- Our large scale and cantilever umbrellas provide substantial shade, have a uniquely contemporary look, and provide an architectural element to your outdoor space.
- FiberBuilt's cushion division manufactures high quality cushions and pillows. We offer a wide selection of standard and custom products that are durable, comfortable and fashionable at competitive prices with prompt lead times.

ARUBA CANOPY

Available on Essex, Lucaya, Riva, Oceana, Bridgewater, Augusta, Diamante and Bambusa umbrellas

- Extra large vent designed for superior wind resistance.
- All standard options regarding canopy designs and patterns apply to these canopies.
- Standard tops are made of marine or furniture grade, solution dyed acrylic. See fabric selections on pages 66-71. Tops are also available in COM.

Detail of Fabric Covered Joint

WHEN ORDERING, ADD THE FOLLOWING CANOPY STYLE TO THE SELECTED UMBRELLA MODEL:

- ARUBA8 - for 8' diam
- ARUBA9 - for 9' diam
- ARUBA11 - for 11' diam

For example, a 9' Bridgewater with Chestnut finish and an Aruba Canopy would be: 9BPU-CH-ARUBA9

A **Double Vent Canopy** is another recommended style for umbrellas that will be used in locations prone to high or gusty winds such as seaside, lakeside, mountainous region or rooftops.

The additional vent allows more dispersal of the wind's energy. Double Vent Canopies are available on most Prestige Collection umbrellas. Canopies can either be made in all marine or furniture grade solution dyed acrylic or with the middle vent made of an open weave mesh that allows even more wind to sail through the canopy. Mesh is available in White, Pacific Blue and Forest Green.

Middle vent with Open Weave Mesh

CUSTOM LOGOS

SILK-SCREENED AND EMBROIDERED

- Silk screened logos can be applied to all umbrellas except Garden and Patio.
- Vector artwork and color specifications are required. Acceptable file formats are: AI, EPS and PSD. Note that for crisp images and fine, straight lines JPG, PNG and TIF files are not accepted for silk screening purposes.
- If vector artwork is not available, we can convert the image to the proper format for an additional charge. Charge depends on the complexity of the logo.
- On the valance, the maximum print size is 18.25" w x 4" h. Larger scale models, such as our 10ft Sq umbrellas, tents and pavilions, have larger valances and the imprint area may increase. Consult factory.
- On the panels, the print size depends on the shape of the logo. For rectangular logos, the maximum size 18.5" w x 12.5" h. For square or round logos, the maximum size 13.5" w x 11.5" h.
- In addition to panel or valance location, indicate how many times the logo is to be printed: on every side, on alternating sides (with blank panels in between), on opposite sides or once per umbrella.
- Logos can be printed with up to 4 solid colors. This is not the same as 4 color process.
- When submitting artwork, provide the PMS numbers for the colors selected. The PMS number is the color's formula.
- Logos are subject to a minimum fee. If set up & printing fees do not exceed the minimum, the minimum charge applies.
- Embroidered logos allow for different size and color specifications than silk screened. Consult factory for additional information.

PHOENIX

STUDIO FIBERBUILT COLLECTION

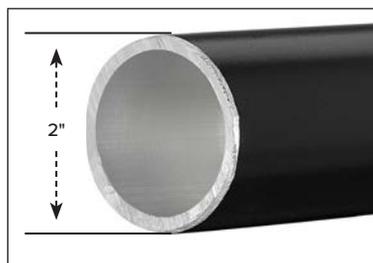

Combining a retro design with innovative construction this model features many structural elements that speak to durability in windy locations. From the upper valanced canopy that provides superior wind resistance to the aluminum hub and joints, this sophisticated and strong umbrella will provide years of stylish shade.

POLE INFORMATION

Phoenix1 - 1 1/2" diam pole

Phoenix2 - 2" diam pole

POLE FINISHES

- Flexible fiberglass ribs with molded nylon end tips
- Hubs, joints and finial are aluminum
- One piece poles are made with heavy duty .125 wall thickness aluminum
- Pole finishes are powder coated or anodized.
- On standard models, the rib, hub, joint and finial color coordinate with the pole's finish color. Optional color scheme available on black poles: the hubs, joints and finial can be requested with silver aluminum finish. Upcharge will apply.
- Storage ties are standard.
- Custom top options include alternating panels, scalloped, ruffle and dentil molding valances, trim, banding, fringe and logos. See pages 2-5.
- Single flat valance is standard. Tops are made of furniture grade, solution dyed acrylic. See fabric selections on pages 66-71. Tops are also available in COM.

CANTINA

SCOLARO BY FIBERBUILT COLLECTION

Providing shade to multiple dining tables at restaurants or multiple chaise lounges on a pool deck, this cantilever model is an excellent choice. The 360° rotating pole allows you to move the shade throughout the day without repositioning the base.

The push up handle with comfort-grip trigger lift means the 10 ft canopy can be raised and readjusted in seconds. Models with two or four canopies provide even greater shade with the benefit of a single pole and base for a smaller overall footprint.

- On single unit 360° rotating pole and canopy –8 rectangular aluminum ribs
- Double and Quad canopies do not rotate
- Finishes on aluminum frame and fittings include Carbon, Timber and White
- Base finish is only available in Carbon and White
- Hydraulic gas strut minimizes the effort to open and close the umbrella.
- Trigger lift with push up handle
- Steel cross base with concrete composite tiles
- Single, sewn-in vent is standard
- Canopies are made of furniture grade, solution dyed acrylic. See fabric selections on pages 66-71.
- Custom top options include valance, alternating panels, banding and logos. See pages 2-5.
- Options include LED light in hub and in ground mount.
- Umbrella and base sold as a set

FLIGHT

PRESTIGE COLLECTION

Let your imagination take flight with the Flight umbrella. The inverted rib system of this patented model provides ample support to the canopy which is nearly horizontal when fully open. The polished aluminum upper ribs create a modern, industrial feel that appeals to boutique hotels and upscale restaurants. The 3/4" diam fiberglass ribs are encased in fabric above the canopy so that from below all you see is the fabric itself.

POLE INFORMATION

One piece, 2" diam
aluminum, .125 thickness

POLE FINISHES

BRIGHT ALUMINUM

- 24" x 2 1/2" upper ribs are gently curved polished aluminum
- Fabric encased fiberglass ribs with molded nylon joints
- Solid aluminum hub
- Pole comes in a bright, anodized aluminum finish
- Sewn-in storage ties are standard
- Custom top options include alternating panels, trim and banding
- Standard tops are made of marine or furniture grade, solution dyed acrylic. See fabric selections on pages 66-71. Tops are also available in COM.

LOCKING PULLEY DETAIL

Detail of pulley rope in Locking Lift Mechanism

The polished aluminum upper ribs and flat, solid aluminum finial provide a contemporary look.

When open the horizontal canopy has a minimal silhouette.

PALM

PRESTIGE COLLECTION

The highly textured palm tree's trunk was the inspiration for this model's pole. The unique design incorporates a simulated bark-like pole, coconut shaped finial and unique multi-vented palm frondesque canopy. The layered tiers of fabric provide superior wind management and are recommended for properties that experience constant ocean breezes.

POLE INFORMATION

CANTILEVER

When your outdoor dining area would function better with an offset umbrella, our Cantilever model will provide the coverage you need without the interference of a center pole. These double vented, aluminum frame contract grade umbrellas are available in a wide array of fabrics to complement any decor. Our 360° rotating Cantilever umbrella features a smooth-glide trigger lift mechanism and a foot activated rotator to provide 100 square feet of comfortable shade.

Detail of Trigger Lift Mechanism

- 360° rotating pole and canopy
- 8 rectangular aluminum ribs
- Bronze finished aluminum frame and fittings
- Trigger lift with crank
- Steel cross base for (4) 80 lb. granite tiles
- Double, sewn-in vent and storage ties are standard
- Canopies are made of furniture grade, solution dyed acrylic. See fabric selections on pages 66-71. Tops are also available in COM.
- Custom top options include valance, alternating panels, banding and logos. See pages 2-5.

ACCESSORIES & OPTIONS

LED LIGHT KIT

UML-LIGHTKIT-4
UML-LIGHTKIT-8

THREE LIGHT SETTINGS

Low

Medium

Bright

To create the perfect ambiance for outdoor dining after dark, add our LED Lighting Kit to the ribs of your umbrella.

- Kit of 8 or 4 elements can be ordered with your umbrellas or as an aftermarket accessory
- The individual LED arms attach to the ribs and connect to the battery pack. Can be daisy chained together for larger umbrellas or greater output.
- Three settings from subdued to bright
- Each light uses only 1.5 watts, providing the equivalent of 25 watt incandescent bulbs when lights are set on high
- Fully charged battery pack lasts up to 8 hours
- Fits on 1/2" and 3/4" diameter ribs
- Rechargeable battery pack fits on 2" diameter pole. Adapter clips available for 1 1/2" diameter pole.

STORAGE BAG

7STO-BAG and 9STO-BAG

With Velcro closure and two handles for Market, Garden and Patio umbrellas

PROTECTIVE COVER

Available in three sizes to accommodate pole diam from 1.5" to 2.5" diam

BAR HEIGHT BOTTOM POLE EXTENSION POLE-EXTM

For Market and Patio umbrellas. Use for in-pool Sun Shelf installation as well as Bar Height tables. Available in White, Champagne Bronze, and Black.

ACCESSORIES & OPTIONS

ALUMINUM SAND AUGER
A-AUGER-AL

For in sand application

- 27" overall height
- 6" diam fin
- Aluminum pole with .125 wall thickness
- Mill finish
- Fits 1 1/2" diam umbrella pole
- * Removable rotator handle included

FIN DETAIL

Carved spacers allow water and sand to drain out.

Installed auger shows proper depth to sink auger into sand and umbrella pole placed in the auger after handle has been removed.

INGROUND MOUNT
MTDECK-AL

- 12" overall height
- 5" diam top plate
- Schedule 40 Aluminum pipe
- Mill finish

Umbrella pole shown in inground unit.

Top View of Mounting Plate showing two screws before tightening around pole and three holes that attach to inground unit.

Side View of Mounting Plate showing screw that tightens the two halves of the plate around the pole.

Cover Plate keeps debris from clogging tube when umbrella has been removed.

INGROUND MOUNT
For Cantina, Venice and Cantilever models
MT-DECKCANT

- Zinc-plated Steel
- 12" x 12" x 13"
- 22 lbs

Consult Factory for specifications and instructions.

ALUMINUM BASES

- Contemporary smooth style
- Available in seven colors
- Base sleeve with through bolt to secure umbrella
- All models ship filled with concrete
- Instructions included. Some assembly and tools required.
- Base must be ordered with the proper sleeve size.
Add to model number:
-2 for 1 1/2" and 2" poles or -25 for 2 1/2" pole

The included cap ensures that the pole fits snugly in the base sleeve by reducing the size of the opening. The cap can be removed if the pole fits securely.

Umbrellas should be secured in the bases using the provided Through Bolt.

White - WH

Silver - SV

Bronze - CB

Black - BK

Teak - TK

Chestnut - CH

Aged Teak - AG

Umbrellas must be secured into properly weighted bases. This is especially crucial for umbrellas used on upper floors, rooftops and windy locations.

T: Umbrella is placed within a Table F: Umbrella is Freestanding

Umbrellas must be secured into properly weighted bases. This is especially crucial for umbrellas used on upper floors, rooftops and windy locations.

CONCRETE BASES

- Recommended for in-table use only
- For use with 7 1/2', 8' and 9' umbrellas
- CB19 available in 4 colors
- All bases come with black trim
- Standard black sleeve accommodates poles up to 1 3/4" in diameter
- Some assembly required

CUSHIONS

Our expert production staff will create high quality cushions that will restore the look and comfort of your outdoor furniture.

Replace worn, frayed or faded cushions on your existing chaises, chairs and benches or add new throw pillows, pool pillows, seat pads and cushions.

Cushions are available in a wide variety of standard sizes. For custom cushions, simply provide us with a sample or template of your existing cushions or pads and we will produce pieces in matching sizes.

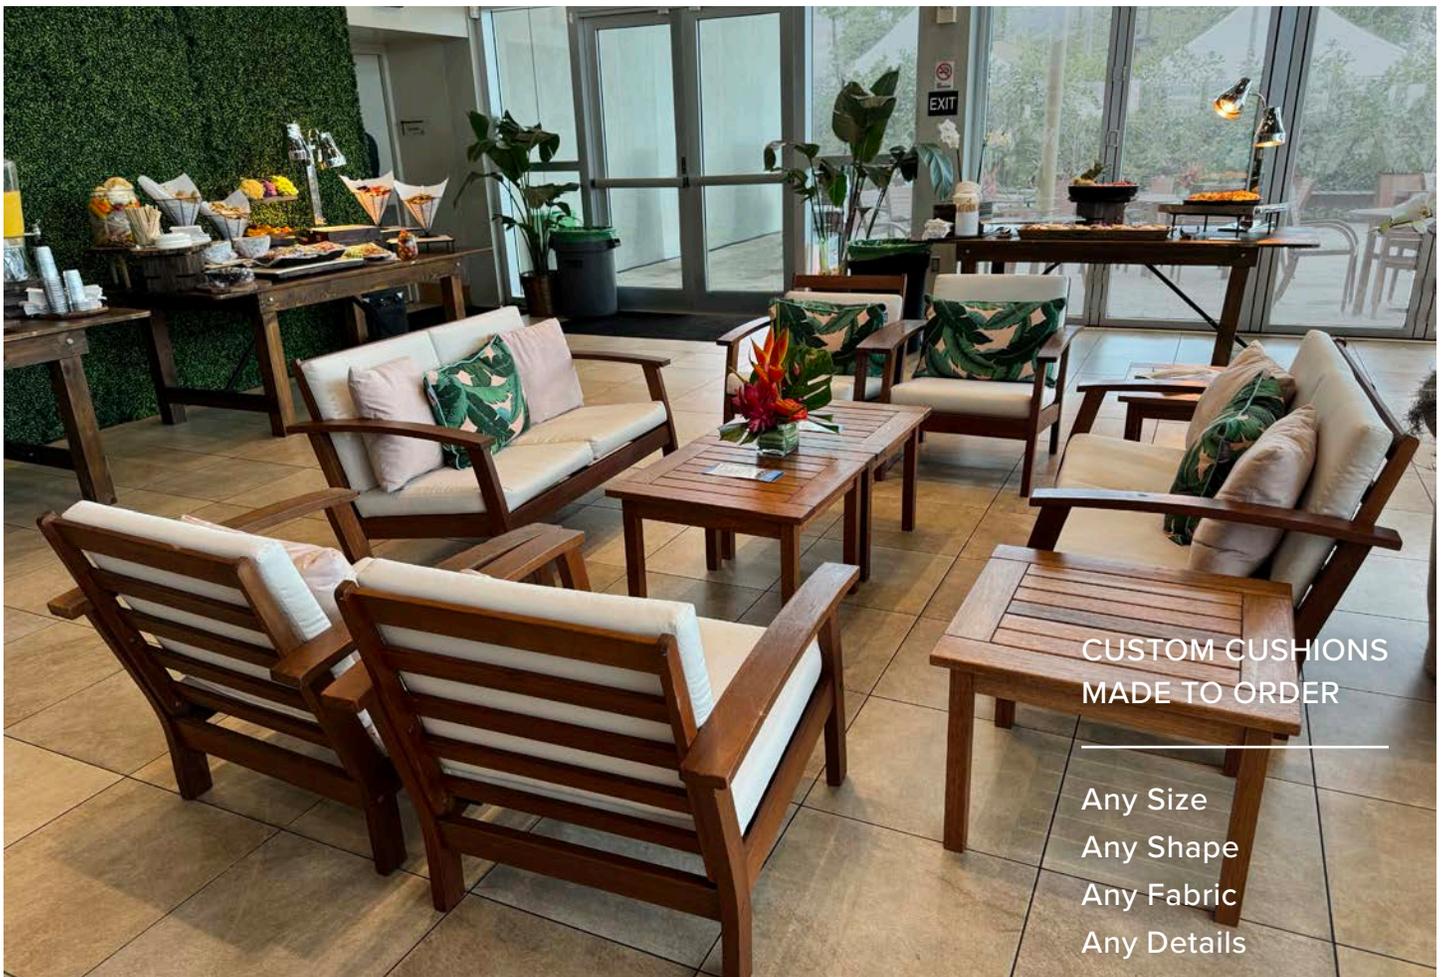

For detailed instructions on how to measure cushions and furniture for replacement cushions, visit our website's Learning Center. Or scan this QR code and watch one of our helpful Youtube videos on how to properly measure existing cushions to order replacements that will fit correctly.

CUSHION CONSTRUCTION

Our standard construction method provides a Dacron wrap around the foam core for shape, loft and comfort.

To aid in the drying process: for all styles and fills, unzip the cushion and drain excess water and stand cushion on its side to dry. Once dry, close zipper.

CUSHION FILL OPTIONS

RETICULATED FOAM

Long lasting comfort with quick drying capabilities. Dries easily after exposure to rain or other forms of moisture and humidity. The open cell design provides maximum water drainage and air circulation allowing cushions to be back in service quickly after being wet.

STANDARD OUTDOOR FOAM

Soft, comfortable and budget friendly. The best application for this foam is in dry climates or protected outdoor settings, such as covered patios and sunrooms.

DENSIFIED FILL

Compressed fiber filling is economical and has a low water retention level. It drains fast and dries quickly, depending on the present weather conditions at your outdoor setting.

CUSHION FEATURES AND OPTIONS

Customize your cushions to fit your furniture needs with details that suit the frame's shape.

Specify your choice of connectors to keep the cushions snugly in place.

Decorative throw pillows are used to enhance a wide variety of casual outdoor furniture

Fabrics used for umbrella canopies and outdoor cushions need to hold up to the kinds of harsh conditions that interior fabrics never experience - direct exposure to intense sunlight, salt air, driving rain are all part of their day to day existence. Year after year they also need to

maintain their color fastness without stretching and remain stain-, mold-, mildew-resistant. For the durability our customers deserve, FiberBuilt uses only solution dyed acrylics made by industry leading manufacturers, including Sunbrella, Outdura, and Tempotest. Visit our website for Tempotest fabrics.

Marine Grade fabrics have a tighter weave, are stiffer to the touch, abrasion resistant, and heavier. The stiffness of the material makes is appropriate for most umbrella canopy applications.

Furniture Grade fabrics are softer, more flexible and can be used for both canopies and cushions, pillows, headrests and poufs, providing a soft hand and comfortable feel.

Visit our website for Tempotest fabrics.

CARE AND MAINTENANCE

Opening your umbrella

When closed, our umbrellas are set in a locked position. Before cranking the handle, pulling the cord or pushing up the hub, pull the ribs gently away from the pole. If the hub does not move easily or cord resists, the umbrella likely remains in its locked position. Proceed with a gentle, consistent motion until your umbrella is fully opened.

Closing your umbrella

For umbrellas held in place by a pin, raise the hub up slightly to easily remove the pin. This will relieve weight and allow the pin to slide out easily. Guide the hub as it slides down the pole allowing ribs to fold completely. Continue with a smooth motion until the canopy is closed. Be sure that there are no obstructions in the ribbing as you close your umbrella. Secure canopy with storage ties when not in use.

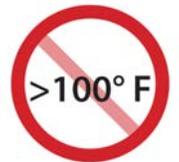

Helpful Tips

Umbrellas should be closed and secured with storage ties when not in use or when winds reach unsafe conditions. If the chance for inclement weather is high, we recommend closing the umbrella, securing it with storage ties and storing it in a sheltered area if possible. Be sure to close your umbrella completely into its locked position and check that it is securely locked in its stand. Storage is the best solution during inclement weather. An umbrella cover is also recommended when your umbrella is stored as it protects against dust, dirt, mildew, and insect damage. Damaged umbrellas should immediately be taken out of service.

Cleaning

To ensure the longevity of your umbrella canopies, clean them regularly. Fabric manufacturers recommend brushing off dirt and wiping up spills before they become embedded. Rinsing canopies on a monthly basis with warm water will help maintain their cleanliness.

The umbrella canopies feature a soil, stain and mildew resistant finish. The canopy may be cleaned while on the fully open umbrella frame. For easier reach, lay the open umbrella down on a clean surface so it's standing on two ribs and the end of the pole. Brush off any loose dirt. Dampen the fabric by hosing it down. Prepare a solution of two capfuls of a mild, natural soap (not detergent) to one gallon of cold or lukewarm water (less than 100° F). Use a sponge or soft-bristle brush and allow the soap to soak in. Rinse thoroughly with clean water. Air dry.

Do not put fabric in a dryer. For spot cleaning of stains, two tablespoons of diluted bleach in the soap mixture above may occasionally be used. Regular cleaning with a bleach solution is not recommended.

See Sunbrella Care and Cleaning for additional instructions and more detailed methods for stain treatments.

Umbrella bases can be cleaned with the same solution of soap and water as the canopies. Brush off any loose dirt and rinse with warm water before applying the solution with a sponge. Rinse thoroughly with clean water and air dry.

CALIFORNIA PROPOSITION

65 WARNING

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

ADVERTENCIA: Este producto contiene productos químicos reconocidos por el estado de California que provocan cáncer, defectos de Nacimiento u otros daños reproductivos.

UMBRELLA WARRANTY

FiberBuilt Umbrellas & Cushions warrants the fiberglass ribs on all Prestige and Studio FiberBuilt Collections Umbrellas (Augusta, Bambusa, Bridgewater, Contempo, Courtside, Diamante, Essex, Flight, Gusto, Lucaya, Nitro, Oceana, Orbit, Palm, Phoenix, Riva, Unico and Viva), Market and 8-rib Beach umbrellas and Pavilions for a period of five (5) years from the date of purchase to the original purchaser against defects in materials and workmanship. The fiberglass ribs on Garden, Patio and 6-rib Beach umbrellas are warranted for a period of one (1) year from the date of purchase to the original purchaser against defects in materials and workmanship. Wood umbrellas, Cabanas, Concrete Bases and upholstery work are also warranted for a period of one (1) year from the date of purchase to the original purchaser against defects in materials and workmanship. Aluminum and Steel Bases are warranted for a period of three (3) years from the date of purchase to the original purchaser against defects in materials and workmanship. Scolaro by FiberBuilt Umbrellas (Cantina and Venice) and Cantilever umbrella are warranted for a period of two (2) years from the date of purchase to the original purchaser against defects in materials and workmanship.

This warranty does not cover the umbrella pole, crank or tilt, normal fading of fabrics and finishes, or chemical stains. This warranty does not cover any damage due to acts of God, abuse, misuse, or vandalism incurred by the umbrella after purchase nor does it cover customer's own material. Tilt models are not warranted for contract use.

For warranty to apply, umbrellas must be secured in property weighted bases, equal to or exceeding the weights provided in FiberBuilt's Base Weight Charts. See Base pages for recommended usage. Placement of umbrellas on rooftops, upper floors, high elevations or wind tunnel-like areas, etc. require appropriate umbrella styles and upgraded base weights as well as the use of through bolts. For these special types of locations, double vented canopies or Aruba canopies are recommended for necessary wind management. Warranty does not cover damage that results from improperly specified umbrellas or bases. Consult factory when ordering for such locations to ensure the product description meets the foreseeable conditions to which it will be exposed.

Though our fiberglass ribbed umbrellas have successfully passed wind tests over 50 miles per hour, FiberBuilt does not recommend leaving umbrellas open during storms or strong winds. Customer is responsible for taking the umbrella down when winds reach unsafe conditions. Normal care and maintenance of products is required to insure years of problem free use.

Damaged umbrellas should be immediately taken out of service. For warranty to apply products must be properly cared for and maintained. Modifications made to the product after production may void warranty. This warranty does not provide coverage or reimbursement for loss of use, time, inconvenience or other damages resulting from any defect in the product. To find out more about our warranty or to file a claim, please contact our customer service department at 866-667-8668. No returns will be accepted without prior approval.

FABRIC WARRANTY

Fabric coverage varies by product. Umbrella canopies made from Sunbrella, Outdura and Tempotest fabrics are warranted from the fabric mill against light fastness. This is a limited pro-rated warranty provided directly from the fabric mill for a period of five (5) years for Sunbrella and Tempotest furniture grade fabrics and for a period of ten (10) years for Sunbrella, Outdura and Tempotest marine grade fabrics. This warranty covers the fabric becoming unserviceable because of loss of color or strength from normal exposure conditions including sunlight, mildew, rot and atmospheric chemicals. It does not cover labor and installation supplied by FiberBuilt Umbrellas & Cushions or any other dealer. In the event that your fabric fails, please contact us to submit a claim and for further details. All fabric must be properly maintained and cleaned regularly for the warranty to be effective. Solution dyed poly, vinyl coated weaves and select marine grade fabrics do not carry an additional warranty.
