

This Year's Show in the Big Apple was a Big Success!

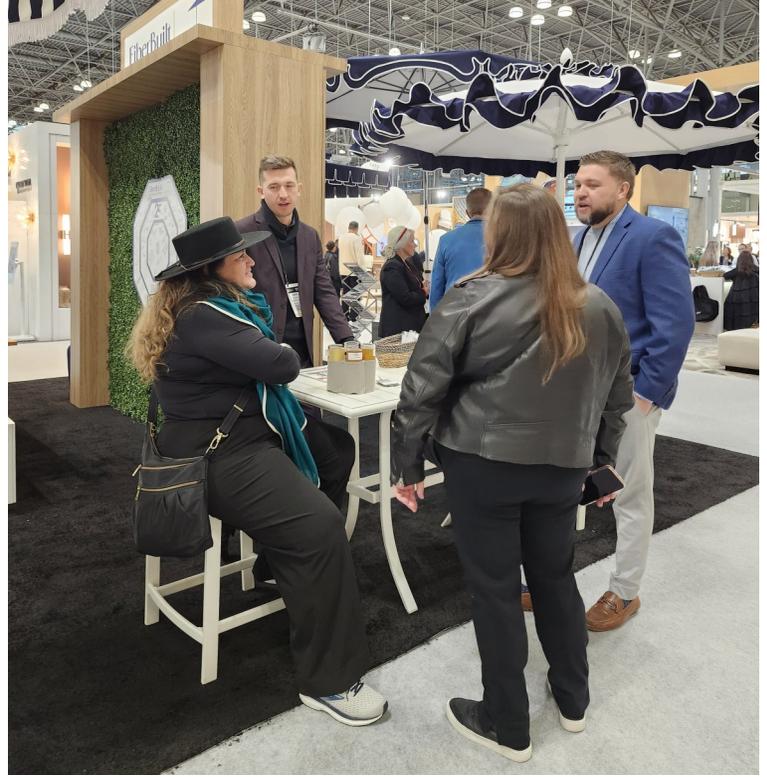

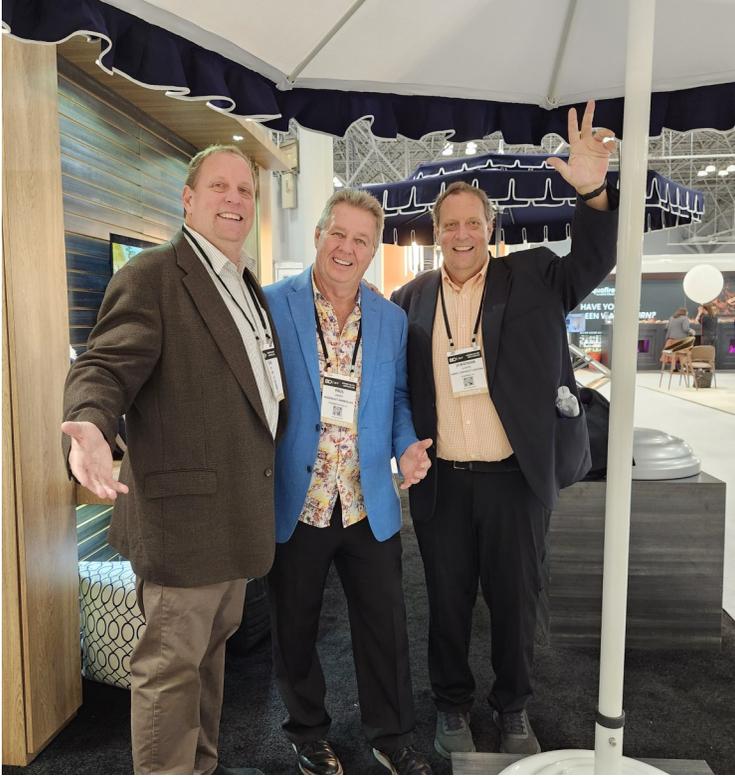

Attendees gravitated to our appetizing varieties of shade products and design options. The deliciously creative canopies with valances, fringes and liners made for a juicy collection. These details appealed to designers who envisioned incorporating them into their upcoming restaurant, hotel, multi-family and country club projects. They also hungered for the coordinating cushions, pillows and poufs.

Thanks to all our wonderful reps who worked our very busy booth and escorted customers to it for in depth and meaningful conversations.

You can count on FiberBuilt for fashionable, functional and durable shade products that enhance your outdoor décor with creative and attractive design details. We look forward to including creative designs from your projects next year.
