

From every angle, FiberBuilt's booth at BDNY showed the diverse breadth of our shade products and our expertise at customizing umbrellas to enhance the unique décor that every property deserves.

The new Studio Collection's Phoenix and Essex models with their aluminum hubs, joints and finials, locking pulley lifts and elegant canopies were introduced to the BDNY attendees.

The new Courtside umbrella with its rectangular canopy, decorative valance, and back drape was designed for use at pickleball and tennis courts.

The 10' square Cantina cantilever umbrella was a particular favorite of the attendees as were the design details including scalloped valances, contrasting fabrics, liners, fringes and tassels.

And our Instagram-friendly relaxation station was a big hit with those enjoying the comfort of our Zuma chairs and posing for one last moment in the sun before the chill of winter descends.

Special thanks to all our reps from around the country who worked the booth and escorted attendees from their areas to our space in order to share with them the continuously growing product lines and creative capabilities that FiberBuilt brings to market.
