

We're grateful to everyone who attended the CMAA Expo in Tampa and made it such a success.

We were able to spend time with many long time, repeat customers and to introduce several general managers, F&B managers and designers (who haven't purchased from us yet) to the structural and customization benefits of FiberBuilt's construction and design options.

We were so pleased by the reception to our new products - from the Double Tier Phoenix shown with a double layered scalloped valance to the Courtside model (on display at the New Product Showcase) designed to provide shade to seating areas beside pickleball and tennis courts.

Whether it was the variety of valance styles and other options to customize the canopies or interest in replacement cushions, customers engaged with us in meaningful and specific ways.

We look forward to continuing these conversations in order to provide shade products in the size, style and color the décor requires along with the custom details that will make each pool deck, dining or lounge area fit the design preferences.

A Special Thank You also to our reps who worked our booth so knowledgeably.
