

## AUGUSTA

### PRESTIGE COLLECTION

This Prestige model features the patented FiberTeak™ simulated wood pole with a 1 3/4" diameter, one piece .125 wall thickness aluminum core, three woodgrain finish choices and 3/4" diameter fiberglass ribs. This structural integrity coupled with the warm wood look is more durable than actual wood umbrellas as they will not warp, check or split.

- Fiberglass ribs with molded nylon joints and end tips
- FiberTeak™ finishes on poles and finials simulate the look and feel of real wood
- The poles are made with heavy duty aluminum cores and a protective, textured fiberglass coating for excellent durability
- All rib, finial and hub colors coordinate with the pole finish color except for Aged Teak which has white ribs and hubs
- Stainless steel hardware
- Single sewn-in vent and storage ties are standard on most sizes. 10' Sq come with Double sewn-in vents and storage ties.
- Custom top options include the Aruba extra large vent, double vent, valance, alternating panels, trim, banding and logos. See pages 33-35.
- Standard tops are made of marine or furniture grade, solution dyed acrylic. See fabric selections on pages 45-51. Tops are also available in COM.
- Pulley & Pin lift is available in place of Push Up & Pin. When ordering change the end of the model number from PU to PP.

## POLE DIAMETER

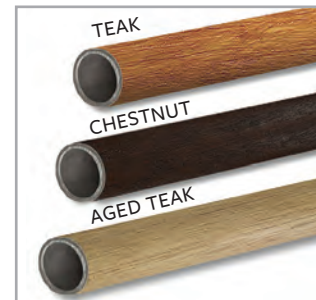

Recommended for freestanding use

## HUB DETAIL
