Umbrellas & Cushions

FiberBuilt Canopy Materials & Care Guide

FiberBuilt's shade products feature high-quality canopy materials designed for durability and long-lasting performance. With the exception of our Garden and Patio umbrellas, all of our umbrellas—as well as cabanas and pavilions—are crafted from **Marine-Grade or Furniture-Grade solution-dyed acrylic fabrics**. We exclusively use premium acrylic fabrics from industry leaders such as **Sunbrella®** and **Outdura®**, ensuring exceptional resistance to fading, stains, mold, and mildew, even with prolonged outdoor exposure.

Fabric Durability & Maintenance

To maximize the lifespan of your umbrella canopies and outdoor cushions, regular cleaning is recommended. Fabric manufacturers suggest:

- **Routine Care:** Brush off dirt and wipe up spills promptly to prevent them from setting.
- **Monthly Rinsing:** Spray canopies and cushions with warm water to maintain cleanliness and prevent buildup.

Cleaning Instructions

Sunbrella's solution-dyed acrylic fabrics are engineered with a protective finish that repels soil, stains, and mildew. To clean your canopy while it remains on the fully opened umbrella frame:

1. Lay the open umbrella on a clean surface, resting on two ribs and the pole's end for easier reach.
2. Brush off loose dirt and hose down the fabric.
3. Prepare a cleaning solution using **two capfuls of mild, natural soap (non-detergent) per gallon of lukewarm water (under 100°F)**.
4. Use a soft-bristle brush or sponge to scrub the fabric lightly, allowing the soap to soak in.
5. Rinse thoroughly with clean water and allow the fabric to air dry.

By following these care guidelines, your FiberBuilt umbrella canopy will maintain its vibrant color and integrity for years to come.
