

Thanks to everyone who visited our booth at this year's HD Expo.

We received many complements from design and purchasing professionals on our custom valances, umbrella styles and colorways. Our models were noted for their style and substance, fashion and function, design and durability.

Thanks also to Restaurant Development + Design for hosting two excellent tours. We were proud to be a stop on the program and to speak to groups of attendees specifically interested in shade products for outdoor dining areas.

And, of course, we're grateful to our knowledgeable and hard working reps who will follow up with you. They'll provide guidance on which models meet the needs of your location and offer feedback on how to specify distinctive shade products with short lead times.

We look forward to working with you on your next project!
