

The Atlanta NEWH Regional show provided us with a great opportunity to exhibit our new Studio FiberBuilt Essex model with its aluminum hub and joints, and the dramatic two-layer, Arabesque valance with a second fabric and black trim. Designers were drawn to the sinuous curves and contemporary look. The silver finished base with wheels for easy movement coordinated with the bright aluminum finish of the umbrella's pole.

Our wind test video, new brochures highlighting our commitment to design innovations and decorative pillows and replacement cushions spoke to the need for durable products that complement your outdoor aesthetic whether the project is for a 5 star hotel, country club, restaurant, or multi-family housing.

FiberBuilt was proud to participate with Specified Agents' other exhibiting lines in a Bingo card draw. Bridget, Debbie and Michael escorted many of the attendees to all of their booths, spoke knowledgeably about each of their

products and introduced us to many designers and purchasing firm staffers. We're grateful for their creative efforts and we congratulate Jessica Fisher, of Pixel Design Co., the lucky winner!
