Umbrella Canopies

Fiberbuilt Umbrellas & Cushions

For 25 years, FiberBuilt Umbrellas & Cushions has specialized in manufacturing shade products that enrich your outdoor dining, bar, lounge, and waiting areas with grace and comfort. In addition to their distinctive umbrella styles and numerous sizes, with models ranging from 8 ft in-table to 10 ft cantilevers and 20 ft center poles that furnish shade over multiple tables, they offer canopy design options to enhance your outdoor décor.

Would your canopies benefit by the inclusion of double-vents for wind-prone locations, decorative valances, gentle fringes, liners, ruffles, silk screened logos, multiple fabrics or banding? FiberBuilt's fashion-forward umbrellas provide years of dramatic elegance and problem-free performance. Designs can produce a retro vibe or a chic, contemporary silhouette.

All products are made to order, incorporate the latest Sunbrella and Tempotest fabrics, and are customized to your imaginative specifications. 93% of Prestige and Studio FiberBuilt collections are made at their Pompano Beach, FL facility with 100% of the canopies cut, sewn, and assembled on site.

No matter the creative canopy options you select, all of the collections deliver stylish shade, are well-suited for restaurant use, combine structural integrity, durability and value, and have short lead times.
