

## Shade Products

### FiberBuilt Umbrellas & Cushions

FiberBuilt Umbrellas & Cushions specializes in shade products that enhance the décor of al fresco dining areas. The distinctive collections and design options, combined with structural integrity, durability and value, allow FiberBuilt to deliver stylish shade.

The collections have a modern aesthetic that are well-suited for restaurant use. Sizes range from 8 ft octagonal in-table models to 20 ft square models furnishing shade to multiple tables for every type of setting.

The new Studio FiberBuilt collection features 5/8" fiberglass ribs, aluminum hubs, joints and finial, and a locking pulley lift with cleat for rope storage. Models are available with 1 1/2" and 2" diam poles for in-table and freestanding applications. Choose from a dozen valance styles, add fringe

for a graceful flutter or silk screen your logo.

For problem-free performance at properties prone to high winds, or if the umbrellas will be used at a rooftop bar, a double vent or extra-large Aruba vent canopy is recommended for wind management. Aluminum, concrete, and steel bases are available in various weights and finishes, with and without wheels.

All products are made to order, customized to your specifications, and have short lead times. For 25 years, FiberBuilt's products have been built for comfort and built to last.
